

# SCRAP CHOPPER STANDS

Chopper Stands to Accommodate the Most Common Scrap Receptacles

## HOPPER STAND

Designed to sit over the SWEED EZ Dump Hopper.

Hopper stand shown with Model 450 DDX and EZ Dump Hopper

## GAYLORD STAND

Designed to sit over a 48 x 40 x 36" Gaylord box.

Gaylord stand shown with Model 450 DDX

## SLIDER STAND

Designed to slide the chopper left or right in order to collect scrap banding into the appropriate recycling bin. This stand allows customers who collect both metal and plastic scrap banding to use one chopper to handle both materials, while separating the scrap for recycling purposes. Fits SWEED Scrap Chopper Models 300, 450 DX and 450 DDX.

Slider stand shown with Model 300 and two EZ Dump Hoppers

## CUSTOM STAND

SWEED can design a stand to meet the needs of any operation, including size requirements, sound dampening needs, and safety concerns. For more information, contact a SWEED Representative.

# SELF-DUMPING EZ DUMP HOPPER

scan here for video

Innovative Storage Container that Provides Maximum Safety for the Operator

The SWEED EZ-Dump Self-Dumping Hopper is the fastest, safest, easiest, and most economical way to load, transport, and dump scrap and bulk material.

SWEED's hopper is designed for forklift handling and offers a unique gravity-activated door latch that eliminates the need for hand trip levers or pushing a bin over. This system offers safe, hands-free operation, allowing workers to stay out of harm's way.

The top loading container is activated by tilting the mast of the forklift forward for complete discharge of contents. As the container tilts, the self-locking mechanism will release the door. As the container is lowered to the ground it will reset and the door will lock. Within a matter of seconds, the EZ-Dump Hopper is ready to go back to work!

## PERFORMANCE DATA

Container Size	½ Cubic Yard
Hopper Length	33 ½"
Hopper Width	26 ½"
Hopper Height	36"
Base Length	39"
Weight (empty)	248 lbs
